EDUCATION

City University of Hong Kong *Sep 2024 – Jun 2026*
M.S. in Data Science

Chengdu University of Technology *Sep 2019 – Jul 2024*
B.S. in Mathematics and Applied Mathematics
Second Bachelor's Degree in Accounting

EMPLOYMENT

The Education University of Hong Kong *Sep 2026 – Present*
Research Assistant *Supervisor: Prof. Weiqiang Tan*

- **Empirical research:** Estimated AI–emissions panel models with two-way fixed effects, lagged predictors, renewable-energy interactions and clustered inference.
- **Research synthesis:** Synthesised ENSO–price evidence and assessed measures of occupational AI exposure, patent-based innovation and labour-market activity.
- **GenAI and funding:** Designed GenAI finance-learning and assessment activities and drafted a Belt and Road green-finance proposal for Hong Kong's PASS.

Vivo Mobile Communication (ShenZhen) Co., Ltd. *Jul – Dec 2025*
Data Analysis Manager Intern *Mentor: Zhiwen Zhu*

- Evaluated search A/B tests and requirements across algorithm, commercialisation and client-side releases; monitored phased rollouts.
- Built SQL tables and experiment/behavioural dashboards; resolved tracking anomalies and automated KPI monitoring to improve reproducibility and workflow efficiency.

Ant Financial (HangZhou) Network Technology Co., Ltd. *Feb – Mar 2024*
Business Analysis Intern *Mentor: Ziyu Hu*

- Developed and automated asset allocation models using Bayesian updating to combine market-implied returns with investor views for investment strategy analysis.
- Processed transaction data with PySpark and enhanced the interpretability of analytical findings through visual reports in Tableau and Power BI.

RESEARCH EXPERIENCE

Predator–Prey Equilibria and Stability *Jun 2024*
Undergraduate Thesis *Supervisor: Shaowen Shi*

- Characterised boundary and interior equilibria of a nonlinear predator–prey model; established conditions for positive-equilibrium existence and uniqueness, and derived Jacobian eigenvalue criteria for local asymptotic stability.

Fire Rescue Forecasting and Station Siting *Jun 2021*
Team Leader, May Day Mathematical Modeling Competition *Provincial Second Prize*

- Led a study of emergency-response data, combining grey and seasonal forecasting, Fourier fitting, regression and spatial correlation with shortest-path optimisation to inform staffing and phased fire-station expansion.

SKILLS & INTERESTS

Programming: Python, R, SQL, MATLAB, C/C++, HTML/CSS
ML & DL: Scikit-learn, PyTorch, TensorFlow
Data & Analytics: Pandas, NumPy, PySpark, Tableau, Power BI
Development Tools: Visual Studio Code, Git/Github, LaTeX
AI Assistants: ChatGPT/Codex/Dots, GitHub Copilot
Languages: Mandarin (native), English (fluent), French (basic)
Interests: Tennis (NTRP 3.5), Football (university team member)
